PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building and maintaining 6 production enterprise web applications and mobile platforms. Skilled in React.js, TypeScript, Next.js, NestJS, TypeORM, and MySQL, with experience developing multi-stage approval workflows, high-density data tables, dynamic PDF/Excel report generation, background job processing using Redis and Bull Queues, and secure file-storage pipelines using MinIO and AWS S3. Strong understanding of clean, modular architecture following the controller-service-repository pattern, with strict client-side validation using Zod and server-side validation using class-validator. Experienced in building scalable REST APIs, database-driven applications, role-based workflows, and responsive user interfaces.

CORE TECHNICAL SKILLS

Frontend: React.js, TypeScript, TanStack Query v5, TanStack Table v8, React Hook Form, Zod, Tailwind CSS.

Full-Stack Frameworks: Next.js 15, NestJS (v10/v11), Node.js

Backend & APIs: RESTful APIs, WebSockets (Socket.IO), TypeORM.

Databases & Queues: MySQL 8, Redis (Caching & Bull Queues).

Storage, Testing & Tools: MinIO Object Storage, AWS S3, Postman, Git, GitHub, Vite.

PROFESSIONAL WORK EXPERIENCE

Inventech Info Solutions Pvt. Ltd. — Full Stack Developer Intern

Dec 2025 – Present | Bangalore, India

- Shipped 6 production apps used by enterprise staff, field engineers, and end users.
- Built React feature modules with TypeScript, TanStack Query, and React Hook Form + Zod.
- Implemented NestJS REST APIs with JWT auth, MySQL, Redis, and MinIO object storage.
- Worked across web and Expo React Native — multi-tenant roles, OTP, and digital certificates.
- Collaborated on code reviews, Git workflows, and production releases under real deadlines.

Production platforms and enterprise systems engineered at Inventech:

IEBA – Bits of Time (Workforce & Time Study SaaS Platform):

| React 19 • TypeScript • TanStack Table • NestJS • Redis • MinIO

- Built core modules for Personal Time Study, scheduled tracking, job classification pools, and automated FTE workload allocation across 6 administrative roles.

- Engineered automated client-side PDF compliance report exports using @react-pdf/renderer and backend multi-sheet Excel generation with ExcelJS, backed by NestJS, Redis caching, and MinIO storage.

Workspere (Workforce Attendance Management System):

| React • TypeScript • NestJS • Bull Queue • Redis • ApexCharts

- Built a 3-tier organizational hierarchy portal (Admin, Manager, Employee) handling timesheet logging, multi-level manager approvals, and subordinate delegation.
- Configured Redis-backed Bull Queues for automated weekly reminder dispatches, submission deadline alerts, and email notifications via Nodemailer.
- Implemented interactive productivity charts with ApexCharts and automated one-click PDF timesheet exports via PDFKit.

CDRMS – Correct Dimension Report Management System (PWD Land Survey):

| React Native • Expo • TypeScript • NestJS • MySQL • GPS

- Developed cross-platform mobile survey features in React Native (Expo) supporting GPS geotagging, on-site photo/video evidence capture, and offline survey drafts for field engineers.
- Built field survey review endpoints backed by NestJS transactions and MySQL for Khatedar land record verification.

CAS – Civic Amenity Site Allotment & Citizen Registration Portal (Karnataka):

| React 19 • TypeScript • Zod • NestJS • AWS S3 •

- Developed end-to-end civic applicant and CA-site allotment modules with multi-step registration, form validation (Zod + React Hook Form), and refund processing.
- Integrated multilingual support using react-i18next alongside secure SMS-based OTP authentication for civic citizens and administrative staff.
- Built automated digital certificate generation, S3 document pipelines, and high-concurrency NestJS APIs backed by MySQL and Redis caching.

Layout Master:

| React 19 • TanStack Query • NestJS • TypeORM • MySQL

- Implemented feature-sliced frontend architecture (TanStack Table v8, TanStack Query v5, React Hook Form + Zod) for high-density administrative data grids.
- →Engineered strict multi-layered NestJS backend (Controllers, DTOs, Custom Repositories) with TypeORM query builders, S3 document storage, and role-based permissions.

Keonics:

| React 19 • TanStack Query • NestJS • TypeORM • MySQL

- Built multi-stage procurement and vendor expenditure approval flows with digital signing, document verification, and S3 storage.
- Developed tenant services, facility booking, and HR resource dashboards with Ant Design, Redux Toolkit, and NestJS APIs.

INDEPENDENT PROJECTS & OPEN-SOURCE RESEARCH

Voice Excel Assistant – AI Spreadsheet Client & Backend API:

| Next.js 15 • React 19 • OpenAI Whisper • NestJS 10 • ExcelJS • MySQL

- Built a hands-free spreadsheet client leveraging the OpenAI Whisper API and Web Speech API for voice-driven cell data entry with column-aware data parsing (dates, currencies, names).
- Engineered an auto-saving grid engine with 500ms debounce persistence, row-level locking, and real-time ExcelJS streaming for .xlsx file generation and downloads.

[Frontend →](#) [Backend →](#)

Smart Healthcare System – AI Symptom Analysis & Scheduling (MCA Final Semester Project):

| MongoDB • Express • React • Node.js • AI Symptom Triage • JWT

- Developed an intelligent telemedicine portal featuring AI-guided symptom checking and doctor recommendation.
- Built an appointment booking calendar with slot management, patient medical record vaults, and role-based access.

[GitHub Repo →](#)

Interactive School & Academy Dashboard (Inventech Training Project):

| React 18 • Vite • Tailwind CSS • Zod

- Designed a responsive timetable scheduling interface using React Big Calendar and Lucide icons, with analytics dashboards built in Recharts displaying attendance rates and exam metrics.

[GitHub Repo →](#)

Realtime Chat & Messaging Platform:

| Node.js • Express • Socket.IO • WebSockets • JavaScript

- Engineered a bidirectional WebSocket event architecture using Socket.IO for low-latency live messaging with active user rosters and typing indicator triggers.

[GitHub Repo →](#)

Online Multi-Vehicle Rental System (BCA Final Semester Project)

| PHP • MySQL • JavaScript • Bootstrap

- Built vehicle catalog filtering by vehicle class, a reservation booking workflow with rental duration calculator, and automated PDF invoice generation.

[GitHub Repo →](#)

Developer Portfolio | *React 19 • Vite • Tailwind CSS*

- Designed and built a personal developer portfolio showcasing projects, skills, and work experience, deployed on Vercel.

[GitHub Repo →](#)

Pharmacy Management System | *Java (Swing) • MySQL*

- Built a desktop application to manage inventory, billing, and user records with secure authentication and automated stock tracking.

[GitHub Repo →](#)

API TESTING & TOOLING

Postman: Organized collections with environment variables (Local, Staging), pre-request auth scripts for automated JWT Bearer tokens, and test assertions (pm.test) for status codes and payload keys.

Swagger / OpenAPI: Documented NestJS REST API endpoints with @ApiProperty and DTO validation decorators for client-server API contract consistency.

EDUCATION

Master of Computer Applications (MCA) — Maharaja Institute of Technology, Mysore 2024 – 2025 | CGPA: 8.5 / 10.0

Bachelor of Computer Applications (BCA) — St. Joseph's First Grade College, Mysore 2021 – 2023 | CGPA: 8.4 / 10.0
